FLUVAL

SURFACE SKIMMER

The SK400 Surface Skimmer removes unwanted water surface film to help improve oxygenation and light penetration for a cleaner and healthier aquarium. Over time, surface films can develop from oils on your skin, household dust, cooking smoke, fat content within fish food and more.
These films are not only visually unsightly, but also reduce dissolved oxygen (required by fish to breathe) and decrease light levels (needed by live plants to grow).

TOTAL **FLOW CONTROL**

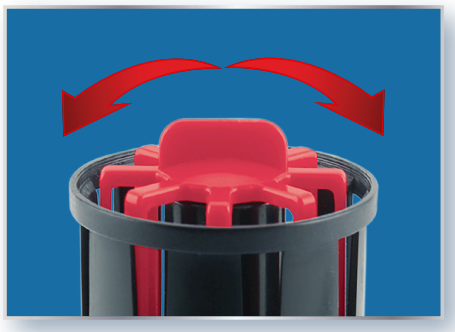

FLOW CONTROL SLIDER

Adjusts overall flow strength, allowing for use in both small and large aquariums.

OUTPUT DIFFUSER

Allows for unidirectional or multidirectional flow.

INTAKE REGULATOR DIAL

Permits skimming intensity to be controlled.

A - Intake Assembly
B - Skimmer Body
C - Output Diffuser
D - Intake Regulator Dial
E - Flow Control Slider
F - Cord Clip

SUPERIOR
CLEANING POWER

- Powerful and consistent skimming eliminates surface film quickly and prevents future build-up.
- Fine filter sponge efficiently traps particles for superior water clarity.

HELPS IMPROVE
OXYGEN EXCHANGE

- Clean water allows for optimal oxygenation and light penetration as gas exchange occurs at the surface.
- Promotes fish and plant health.

SELF LEVELING

- Unit has ability to self level itself irrespective of the water level in the aquarium. It adjusts and keep on skimming.

COMPLETE **VERSATILITY**

- Unique backside spacer permits placement on rimmed and rimless aquariums.
- Floating intake assembly self-adjusts to water level fluctuations so unit runs continuously.
- Compact size – unit can be positioned anywhere in aquarium without obstructing view.
- Modular design allows parts to be easily accessed, removed, and cleaned.

Rimmed Aquarium

Rimless Aquarium
