NEO BIO 1000

Versatile 3-in-1 filtration

NEO BIO 1000

Cartridge modular filter

Neo Bio Filter 1000 is a modern internal filter with a modular cartridge for freshwater aquariums.

It provides effective three-stage filtration: mechanical, biological and chemical. Thanks to its compact design and high pump capacity (1000 l/h), it is perfect for aquariums with a capacity of up to 250 liters.

Innovative solutions such as ready-made filter sachets and interchangeable modules make it extremely easy and convenient to use. In addition, the energy-saving pump ensures low power consumption, and the corner shape adapts to the walls of the aquarium.

The filter can be expanded with additional modules – up to 3 additional containers. This means more filter surface and a larger volume of biological media!

NEO BIO 1000

Cartridge modular filter

Comfort

Convenient and strong mounting bracket – perfect fit to the walls of the aquarium

corner shape – takes up little space with a large filter area

Bulk media container – ideal conditions for the development of beneficial nitrifying bacteria

Quick and easy to replace filter cartridges – motor stays in water

NEO BIO 1000

Cartridge modular filter

Customization

precise flow regulator at the top of the device – convenient adjustment

two outlet nozzles – directional with aerator and wide-jet

easily replaceable function inserts

basket for any loose, biological or chemical media

functional frame attached to strong suction cups

Cartridge modular filter

Replaceable filter included

directional nozzle and
aeration – any setting
of the outlet direction

180° wide jet nozzle –
aeration thanks to the
movement of the water
surface

NEO BIO 1000

Dedicated Function Cartridges

*w komplecie z filtrem

STANDARD WOOL

- Replaceable filter wool cartridge
- Efficient mechanical filtration

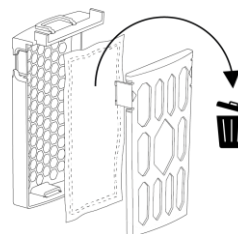

CARBOMAX*

- Replaceable filter wool cartridge with activated carbon
- additionally eliminates chemical impurities and discoloration from the water

PHOSMAX

- removes phosphate from water
- prevents algal blooms caused by excessive phosphate levels

During maintenance, only the cartridge needs to be discarded from the cartridge

NEO BIO 1000

Cartridge modular filter

Media Biological

A basket hidden inside the filter for any loose, biological or chemical media

additional filtration surface and bacterial growth site

biological media included and can be replaced with any loose, biological or chemical media

convenient disassembly for replacement or service

NEO BIO 1000

Modular expansion

The Neo Bio Filter 1000 can be expanded with additional modules. Each module contains as many as 2 baskets for bulk media and 2 function cartridges.

Additional modules are an added benefit – increased filtration capacity and the ability to expand as needed, without having to replace the entire filter! More bulk media baskets allow you to freely mix the media and rotate them during periodic filter agent changes.

NEO BIO 1000

Cartridge modular filter

The Neo Bio Filter 1000 is a safe filter for shrimps, fry or small aquarium fish.

The protective sponge prevents small organisms from being sucked in, and the quiet operation does not stress the fish. This ensures safety and comfort for even the most sensitive species.
