Modular cartridge filter

Neo Bio Filter 1000 is **a modern internal modular cartridge filter** for freshwater aquariums.

It provides effective three-stage filtration: mechanical, biological, and chemical. Thanks to its compact design and high pump capacity (1000 l/h), it is ideal for aquariums with a capacity **of up to 250 liters**.

Innovative solutions, such as **ready-made filter bags and replaceable modules**, make it extremely easy and convenient to use. In addition, the energy-efficient pump ensures low power consumption, and **the corner shape** fits the walls of the aquarium.

The filter can **be expanded with additional modules** – up to 3 additional containers. This means more filtration surface and greater biological media volume!

Dedicated functional cartridges

*complete with filter

STANDARD WOOL

- replaceable cartridge made of filter cotton
- efficient filtration mechanical

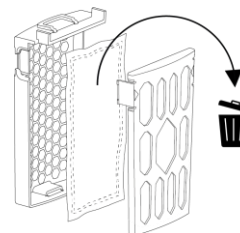

CARBOMAX*

- replaceable filter cartridge made of filter wool with activated carbon
- additionally eliminates chemical impurities and discoloration and discoloration

PHOSMAX

- removes phosphates from water
- prevents algae blooms caused by excessive phosphate levels

During maintenance
, simply discard
only the cartridge from
the cassette

NEO BIO 1000 additional modules

Modular expansion

The Neo Bio Filter 1000 can **be expanded with additional modules**. Each module contains 2 baskets for loose media and 2 functional cartridges.

Additional modules offer an added benefit – **increased filtration capacity** and the possibility of expansion as needed, without having to replace the entire filter! More baskets for loose media allow for free mixing of media and their rotation during periodic replacement of the filter substance.

NEO BIO 1000 additional modules

Modular cartridge filter

Neo Bio Filter 1000 is **a safe filter for shrimp, fry, or small aquarium fish.**

The protective sponge prevents small organisms from being sucked in, and its quiet operation does not stress the fish. This ensures **safety and comfort** even for the most sensitive species.
