

NEW

A modern and even more efficient lamp designed for tanks that are up to 35 cm high and have a capacity of 10 to 50 l. Replaces its predecessor, the LEDDY SMART lamp. The lamp employs an advanced LED technology, in which multiple light-emitting diodes are concealed all over the surface of the lampshade.

High-power LEDs (6 W) emit light at a colour temperature of 6500 K (SUNNY) or 8000 K (PLANT), with a luminous efficiency that is comparable to that of a regular 15-watt linear fluorescent lamp. The use of as many as 15 LEDs with a total power of 6 W in one lamp ensures a uniform and optimal illumination of the entire tank.

PRODUCT OF POLAND

COMMERCIAL ADVANTAGES

- long-lasting: up to 50 thousand hours of operation, corresponding to about 10 years of life
- versatility: lamps with the colour temperature of either 6500 K or 8000 K
- each of the two models – SUNNY and PLANT – is available in black or white
- easy to mount on any tank wall that is up to 6 mm thick
- ideal for shrimp tanks and small freshwater aquariums
- a unique design, a futuristic shape
